CAREER SUMMARY

- I am looking for a position with a span of control that can give me the ability to positively impact business. I aspire to create solutions that deliver superior value;
- Personal attributes include strong communication and analytical skills, proactive thinking, quick learning abilities and well-established teamwork and leadership skills. I am a hardworking professional with rich multinational experience and deep understanding of Western and Eastern working culture. Being a Russian native speaker, I have native fluency in English and strong writing, reading and speaking Chinese skills;
- Industry experience includes Supply Chain and Consulting. Functional areas of application include: Supply Chain, Logistics, Material Management, Business Analysis, Operational Improvement, Lean Management and Market analysis.

PROFESSIONAL EXPERIENCE

February 2015 – June 2016

Supply Chain Specialist – Wallenborn Transports S.A.

- ✓ Customer service and Key Account Manager for Qatar Airlines freight handling:
 - Providing daily support for all the customer requests, including shipment status, estimated departure and arrival time, price requests, etc.;
 - Reassuring effective and timely resolution to all the supply chain failures, caused by either external or internal factors;
- ✓ Supply chain system and processes optimization:
 - Conducted functionality assessment and analysis of the used IT solution for sales, costs and margin calculation (AS-TRANS);
 - Introduced a number of improvements to the analysed IT tool;

November 2013 – June 2014

Supply Chain Specialist - Lear Corporation, Shanghai China

- ✓ Continuous responsibility for consolidation and updates of Asia Region Roadmap Initiatives and Performance Tracking:
 - Supporting accuracy of financial forecasting;
 - Facilitating Electrical and Seating Logistics roadmap alignment.
- ✓ Lead Logistics Network Optimization for China Seating:
 - Introduced data gathering and analysis standard for Logistics Network Optimization process;
 - Developed and mapped out the strategy for Supply Chain improvement for Lear China's largest Seating plants (CQ JIT & Metals);
 - Identified potential of 20-25% (\$300k annually) savings along with leaner logistics service for the plant;
- ✓ Supported LEAR Malaysia Supply Chain recovery and Supply Chain strategy development that would drive company's logistics cost-saving potential to the optimum:
 - Participated in the estimation of the current Supply Chain status, development and introduction of new robust standardized processes for proper Supply Chain functioning;
 - Introduced Logistic Study Template (LST), gathered, systematized and analyzed logistics data of LEAR Malaysia internationally sourced parts;

- Created and distributed an RFQ for all internationally sourced parts (75 lanes: 51 Ocean & 46 Air lanes (22 overlap); 11 bidders);
- Participated in a project team for consolidation of Mexico sourced parts for Malaysia: gathered and analyzed data, created a roadmap for consolidation center implementation;
- ✓ Participated in Thailand Logistics Network Optimization:
 - Took part in strategy definition, data gathering and analyses to determine topology of consolidation centers in Mexico and EU and a PDC (part distribution center) in Thailand.

February 2013 – July 2013 (6 months)

Marketing Specialist in Automotive Consulting Company MSX International Shanghai China

- ✓ Conducted automotive market researches for China and client presentation support;
- ✓ Researched and analyzed potential business opportunities and directions for the company's development;

September 2007- August 2008 (1 year)

Internet XSLT developer\ Assistant Team-leader, Generation_P, Minsk, Belarus

- ✓ Project definition: Write mini programs, using XML/XSLT to process XML/xhtml internet pages, to provide a customer with Airline-flight search results from multiple web sites;
 - Achieved full technical competency in 3 months without prior training or experience;
 - Mastered all the procedures involving web-scraping (CVS repository; PAROS (POST/GET tamper); Oxygen+Eclipse; OTA XML; and analyses of log files of tomcat server) after which I was promoted to the assistant team-leader position;
 - Assistant Team-leader – supervised a team performing patch-and-release responsibilities;
 - Negotiated business solutions with foreign customers (Ireland).
